DETAILED ACTION

Claims 1-2, 4, 6-19, 29-34 are pending in this application. Amended claims 1-2 6-8, 10-11, 13-17, 19, 29-34 are noted.

The amendment dated 3/29/07 has been entered and carefully considered. The examiner appreciates the amendments to the claims. In view of said amendments, the previous 112 rejection has been withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-2, 4, 6-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In independent claim 1, the term “contiguous predetermined surface energy” is deemed new matter as there is not support for said term in the original specification as originally filed. The same issue applies to independent claims 10, 16 and their dependent claims.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-2, 4, 6-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Willson et al. (6,334,960) in view of Westmoreland (6,446,933) and Morita (Jpn. J. Appl. Phys., Vol. 42 (2003) for the reasons listed in the previous office action.

Allowable Subject Matter

Claims 29-34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 3/29/07 have been fully considered but they are not persuasive.

Applicant first argues that the reference fail to teach the recitation of claim 1 (p.8 lines 5-13) and recites what the references do teach (paragraph bridging pp.8-9).

The examiner disagrees. It is noted that the applicant arguments are directed to the entire claim. Applicant is invited to point out what specifically the references are deficient in. Willson clearly teaches forming a patterned template which contain nanoscale protusions in a patterned surface. The patterned surface will inherently provide a surface energy. It is the examiner's positions that the references clearly teach the limitations of the independent claims.

Art Unit: 1762

Applicant argues that Morita's template has different material associated therewith i.e. diamond-like carbon and silicon and this will have different surface energies (paragraph bridging pp.8-9).

The examiner agrees in part. While the reference does teach different materials, it is noted that the claims do not preclude the use of diamond-like carbon and silicon. However, in light of this argument, dependent claims 29-34 are deemed allowable subject matter.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
